MOUNTING POINT FOR THE SAFETY CABLE

Always secure the accessory with a suitable safety cable from falling in case the primary mounting method fails.

Safety attachment: Always secure the DOME and the SNAPBAG with a suitable safety cable when the primary mounting method fails, as shown in picture 6 and 7.

→ The universal QLM adapter creates a direct mounting point for Orbiter specific DoPchoice products. The digital optic interface communicates with the optics attached and automatically makes adjustments to the color output if required. Damages on the interface can cause mal- or disfunction of the Orbiter.
